TO THE

MATHEMATICAL GAZETTE

No. 232, FEBRUARY 1935—No. 236, DECEMBER 1935.

COMPILED BY MRS. T. A. A. BROADBENT.

1. Articles.
2. Mathematical Notes.
3. Reviews and Notices.
4. News of Branches.
5. Gleanings Far and Near.
6. The Pillory.
7. The Library.
8. Correspondence.
9. Miscellaneous.

ARTICLES, ETC.

AUTHOR.	TITLE.	PAGE
R. J. A. Barnard.	Lagrange's equation.	31
J. Clemow.	The harmonic conics.	98
L. Crawford.	Determination of the focus and directrix of a parabola whose equation is given with numerical coefficients.	87
N. R. C. Dockeray.	The teaching of mathematical analysis in schools.	321
	Discussion : T. A. A. Broadbent (p. 336) ; C. V. Durell (p. 337) ; F. J. Swan (p. 338) ; K. S. Snell (p. 339) ; H. Pfann- muller (p. 340) ; J. Katz (p. 340).	
Sir A. S. Eddington.	The problem of A , B , C and D .	256
A. R. Forsyth.	Old Tripos days at Cambridge.	162

AUTHOR.	TITLE.	PAGE.
N. M. Gibbins.	Hamilton's extension of Feuerbach's theorem.	34
	A chapter on limits.	249
J. Hadamard.	La notion de différentielle dans l'enseignement.	341
D. R. Hartree.	The bearing of statistical and quantum mechanics on school work.	73
W. Hope-Jones.	The solution of triangles, given three sides.	180
	Discussion :	
	F. C. Boon (p. 184) ; M. P. Meshenberg (p. 185) ; E. H. Neville (p. 186) ; W. Hope-Jones (p. 186) ; E. H. Neville (p. 187).	
	Appendix : W. Hope-Jones, M. P. Meshenberg (p. 187).	
J. O. Irwin.	Some aspects of the development of modern statistical method.	18
S. P. Johnson.	Conic-tracing in line coordinates.	94
H. Lob.	The orthocentric simplex in space of three and higher dimensions.	102
H. V. Mallison.	The use of signs in geometry.	124
S. Minois.	L'enseignement des mathématiques en France dans les Lycées et Collèges.	189
E. H. Neville.	Presidential Address, 1935. The Food of the Gods.	5
G. L. Parsons.	The work of a junior mathematical association.	65
	Discussion :	
	F. C. Boon (p. 70) ; E. H. Neville (p. 70) ; W. F. Bushell (p. 71) ; A. C. Heath (p. 71) ; E. H. Neville (p. 72) ; A. C. Heath (p. 72) ; M. P. Meshenberg (p. 72).	
D. K. Picken.	On differentials.	79
C. G. Paradine.	The factorisation of large integers.	267
F. B. Pidduck.	On Lagrange's method of scalar analysis.	260
R. T. Robinson.	Theorems on the tetrahedron.	356
E. F. Simonds.	The coefficients of the series for $\tan x$.	37
E. H. Smart.	An elementary introduction to line geometry.	274
V. Thébault.	Triangle et quadrilatère bordés de triangles équilatéraux.	90
W. R. Thomas.	John Napier.	192
C. E. Weatherburn.	On geodesic ellipses and hyperbolae.	258
F. P. Wilson.	English Letters and the Royal Society in the seventeenth century.	343
G. Windred.	The interpretation of imaginary mathematical time.	280
	Annual Meeting of the Mathematical Association, 1935.	1
	Report of the Council for the year 1934.	2
	Our new Honorary Members.	4
	The first encounter with a limit.	109
	Discussion :	
	E. H. Neville (p. 109) ; T. A. A. Broadbent (p. 109) ; N. R. C. Dockeray (p. 113) ; W. Hope-Jones (p. 117) ; N. M. Gibbins (p. 120) ; A. Robson (p. 120) ; G. N. Watson (p. 121) ; M. P. Meshenberg (p. 121) ; G. H. Hardy (p. 121) ; C. T. Daltry (p. 122) ; G. W. Ward (p. 123) ; T. A. A. Broadbent (p. 123).	
A Bristol colloquium.		298

v

MATHEMATICAL NOTES.

AUTHOR.	No.	TITLE.	PAGE.
R. C. Archibald.	1156	Burrow's or Carnan's <i>Diary</i> .	222
A. A. K. Ayyangar.	1131	A generalisation of the Frégier point.	43
F. C. Boon.	1143	To bisect a triangle by a line drawn through any point in its plane.	207
	1161	On the calculation of logarithms.	294
F. Bowman.	1139	Small oscillations of a body with one degree of freedom.	141
	1159	The series for $\tan x$.	291
H. H. Brazier.	1144	A problem in probability.	208
A. Buxton.	1145	Note on approximate integration.	209
H. S. M. Coxeter.		See P. S. Donchian.	
P. S. Donchian and H. S. M. Coxeter.	1142	An n -dimensional extension of Pythagoras' theorem.	206
M. F. Egan.	1166	Gamma functions and Fresnel integrals.	366
N. M. Gibbins.	1154	A correction.	221
S. L. Green.	1153	Some applications of the conformal transformation $Z=z+a^2/z$.	220
E. A. Guggenheim and E. H. Neville.	1148	Why use tables?	213
S. G. Horsley.	1162	On Note 1129.	295
A. Inglis.	1140	The arc of a hyperbola.	142
B. E. Lawrence.	1135	The determination of the coordinates of the foci of a curve.	138
	1155	A proof that the arithmetic mean of any number of positive quantities is greater than their geometric mean.	221
	1163	On conics which have double contact.	295
G. J. Lidstone.	1151	On Note 1130.	218
J. E. Littlewood.	1164	Three curious results.	297
A. Lodge.	1138	Length of a circular arc.	140
	1152	Integers expressible as the sum of two rational cubes.	219
	1167	Approximate weight of an iron pipe.	367
	1168	Theorems on centroids.	367
H. V. Lowry.	1147	Moments about the instantaneous centre. Expansion of a remark in a review.	211
	1158	The perpendicular distance of a point from $Ax+By+C=0$.	291
R. C. Lyness.	1136	Method for finding the foci of the general conic.	138
N. W. McLachlan.	1149	Bessel functions for engineers.	215
J. J. Milne.	1137	Historical note.	139
R. F. Muirhead.	1130	Note on the decimal point.	42
V. Naylor.	1132	To inscribe the principal ellipse in a parallelogram.	44
E. H. Neville.	1128	Inverted practice: an extension of "Russian peasant" multiplication. See also E. A. Guggenheim.	40

AUTHOR.	No.	TITLE.	PAGE.
S. Richardson.	1170	The integration of $\sec x$ and $\sec^3 x$.	369
A. Robson.	1157	Conormal points on an ellipse.	223
J. W. Stewart.	1141	If the bisectors of the base angles of a triangle are equal, the triangle is isosceles.	144
	1150	Note on the decimal point.	218
S. Subramanian.	1169	The section of a cone by a plane through its vertex.	368
V. Thébault.	1160	Sur l'orthopôle.	292
	1165	Curiosités arithmétiques.	365
V. I. Todhunter.	1134	Two "Lewis Carroll" problems.	137
J. Travers.	1129	A challenge.	41
	1162	On Note 1129.	295
C. O. Tuckey.	1133	The "alternate segment."	44
	1146	Multiplication of determinants.	211

REVIEWS AND NOTICES.

AUTHOR.	TITLE.	REVIEWER.	PAGE.
